

## Short training course: GTAP Model

A short training was conducted for faculty , PhD and MSC students and last year undergraduate students of the Department of Natural Resource Economics on March 8, 2015 on the Global Trade Analysis Project (GTAP Model). The training was delivered by Dr Alessandro Antimiani, a GTAP expert from the Italian Agricultural Economics Institute, with the assistance of the chair Dr. Houcine Boughanmi. Around 20 students participated in the training. Dr Antimiani visited the department to provide support on regional trade integration and help in running the various scenarios using the GTAP model.
